Profile Summary

Final-year Software Development student currently completing a Diploma in Software Development at Rosebank College, with expected graduation in 2027. Hands-on experience building desktop and web-based applications using C#, Java, HTML, CSS, JavaScript, and Firebase.

Built academic projects involving authentication, user interaction workflows, file handling, structured application logic, and interface design. Interested in building practical software that improves usability and solves real problems.

Currently seeking internship, graduate, or entry-level software development opportunities to gain industry experience and contribute to real-world products.

Technical Skill

- Languages: C#, Java, HTML, CSS, JavaScript
 - Tools & Technologies: Git (basic), Windows Forms, Firebase
- Development Areas: Web Development, Desktop Application, Basic Mobile Concepts

Academic Projects

Contract Monthly Claims System (C# Windows Forms Application)

- Developed a desktop GUI application using C# and Windows Forms
- Implemented activity logging and structured workflow handling
- Focused on usability, application flow, and interface clarity

NoteCircle - Student Note Sharing Platform (Prototype)

- Designed and developed a prototype web application for sharing academic notes
- Implemented file upload functionality and system notifications
- Focused on interface structure, usability, and student collaboration workflows
- Explored how a note-sharing platform could support academic collaboration

Java ChatBot

- Built a rule-based chatbot with structured conversation flow
- Implemented simple logic handling for user interaction and response routing
- Designed foundational conversation architecture and response handling

Education

Rosebank College

2024 - 2027(Expected Graduation)

Soft Skills

- Problem-solving
 - Analytical thinking
 - Communication
 - Adaptability
 - Team collaboration

Additional Information

- Open to relocation (Johannesburg & Cape Town)
- Interested in software development, mobile application development, UI/UX design, and cybersecurity
